## FACE CONSULTANTS LTD

Global Flooring Consultants
TablesA.1, A. 2 and A. 3 from VDMA Guidelines 2010

|  | $\mathbf{Z}_{\text {slope }}(\mathrm{mm} / \mathrm{m})$ | $\mathrm{dz}=\mathbf{Z} \times \mathbf{Z s l o p e}$ |
| :---: | :---: | :---: |
| 15 | 1,0 | $\mathbf{Z} \times 1,0 \mathrm{~mm} / \mathrm{m}$ |
| 10 | 1,5 | $\mathbf{Z} \times 1,5 \mathrm{~mm} / \mathrm{m}$ |
| up to 6 | 2,0 | $\mathbf{Z} \times 2,0 \mathrm{~mm} / \mathrm{m}$ |
| Note: For beam levels >6m, interpolation is required as <br> illustrated in figure B.1 |  |  |

Table A. 1
Limiting values of $Z_{\text {SLOPE }}$

| Distance between <br> measurement | Gap under <br> straight line t |
| :---: | :---: |
| 1 m | 2 mm |
| 2 m | 3 mm |
| 3 m | 4 mm |
| 4 m | 5 mm |

Table A. 2
Limiting values along the tracks

| Top beam level (m) | Fx or Fx,avg |
| :---: | :---: |
| 15 | 525 |
| 10 | 400 |
| up to 6 | 300 |
| Note: For beam levels $>6 \mathrm{~m}$, <br> interpolation is required. |  |

Table A. 3
Limiting values of Fx or Fx , avg
